

MEGC LEASING

Capacity

High pressure manifolded cylinders in containers:
Available in 20, 30 and 40 footer tank containers

All tank types : Type I / Type II / Type III / Type IV
(carbon steel to carbon fiber)

Specifications

Pressure: 380 bar
System size: 40 foot / Total volume: 39,900 liters
Cylinder type: Type IV (EN 17339)
Hydrogen capacity (at 15°C): 1,029 kg
Number of sections: 9
Total weight incl. H₂ (without chassis)* 20,000 kg

Carbon Steel MEGC

Leasing of MEGC (Multi element gas cylinders) for hydrogen transportation

Suitable products : Hydrogen but also Nitrogen trifluoride, Tetrafluoroethane and other gases
